Qin Zhang （张钦）

Short Bio: I am a Software Engineer at Google working on LLM Agents and Reinforcement Learning.

Experience: Google (2024-now), Tencent (2020-2024)

Selected Projects: Enterprise Agentic Systems (Personal Health Assistant, UGC Game Level-Building Agent, Web3 Trading Agent); Game AI in Flagship FPS Games: 1.0 (human-like RL with GAIL & PPO), 2.0 (LLM-driven 3D scene reasoning & action scheduling)

Selected Publications: "Muscle memory for agents: compile not merely retrieve" (2026); "More agents is all you need" (2024); "Affordable generative agents" (2024); "Performance analysis on distributed storage systems in ring networks" (2020); "Evolving knowledge graphs" (2019)

Education: Shanghai Jiao Tong University, M.S. (2017-2020) & B.S. (2013-2017)

Work Performance: received consecutive top performance ratings (Transformative Impact) at Google, and Google Cloud's highest honor, the Cloud Club Award (2026).
